## WILL MONOPOLY OF A MAN **HEAD OFF ALL COMPETITION?**

By DOROTHY DIX.

The Rev. Dr. Talmage once told his place in character go on. One goes forcongregation that nine-tenths of all divorces are due to the temptations of the summer vacation, and he warned women not to go off on a summer vacation.

congregation that nine-tenins of all ward and one goes accessful of the divorces are due to the temptations of the summer vacation, and he warned women not to go off on a summer vacation unless they were willing to risk losing their husbands.

Is Dr. Talmage right or wrong? Does the summer vacation promote domestic felicity, or is it the first aid to the divorce court?

Is a woman more sure of being in a mian's thoughts when she is so directly under his eye that it is physically impossible to forget her, or does he think most tenderly of her when she is far away, and her remoteness makes a transfiguring haze that magnifies her charms and conceals her faults?

Should a wife, in particular, who desires to retain her husband's affection,

most tenderly of her when such as land away, and her remoteness makes a transfiguring haze that magnifies her charms and conceals her faulte?

Should a wife, in particular, who desires to retain her husband's affection, give him her society in allopathic or homeopathic doses?

Two Views About Husbands.

This is a problem concerning which there is a great diversity of opinion in feminine circles. Some women contend that, as man is but a creature of habi and imperfectly domesticated at best, it is never safe to let him quit eating out of your hand, while other women hold that more love is bored to death than populive Made in Simple Lines of Expensive Made in Simple Made in Simpl

is killed in any other way.

And both of these opposite theories have a certain degree of right on their

We all admit that propinquity is the great match-maker, and if it is so valuable in catching a man it should be equally useful in holding him. The women who subscribe to this belief are those who never leave their husbands for a single day, and insist upon sharing all of their work and pleasure. Theirs is the matrimental trust spirit—to establish such an iron-bound monopoly over a man that it will head off all competition.

It cannot be dealed that there is much to be said in support of this view of the situation. There is nothing for keeping a man home of evenings like knowing is man home of evenings like knowing is the beginning of virtue in more husbands than we wot of.

Love Can Die of Ennut.

Now come some very fantastic Japanese coat fashions. Their materials are expensive, it is true, but many of them are made on the simplest kimono lines and can be copied easily by the woman who has taste and an old kimono for model, even if she has but very little with whe needle. A coat, for instance, which in chiffon can be used either as a tea gown or in a situation. There is nothing for keeping is man home of evenings like knowing is the beginning of virtue in more husbands than we wot of.

Love Can Die of Ennut.

he has to render an account of himself if he is absent, and the fear of his wife is the beginning of virtue in more hasbands than we wot of.

Love Can Die of Ennui.

Not all of the arguments, however, are on the side of those who contend that love must be always a personally conducted excursion; for if love can die of loneliness in the absence of its beloved. It is equally susceptible to the blighting influence of ennui, and the deadest dead love in the world is that which has yawned itself into the grave.

In married life there can be no gainsaying the fact that the majority of people quarrel because they see too much of each other, and thus get on each other world he fewer divorces.

The front breadth is slit up the middle and the slit extends a little way down the back to form the back of the neck. It can be left V shape or be rounded out in the back, according to the trimming to be used.

The selvage or outer edge of the material is turned back several times to form a cuff for the sleeve, and the two sides of the material are tacked together below the space allowed for the arm to come through.

The bottom of the coat is hemmed and can be embroidered or trimmed with one of the band embroideries. A band of embroidered or trimmed with one of the band embroideries. A band of embroidered or trimmed with one of the band embroideries. A band of embroidered or trimmed with one of the band embroideries. ## Daily Fashion Talk for Herald Readers

Combination Illustrated Insures Flatness Around the Hips, With Neither Lines Nor Wrinkles. It Is a Very Satisfactory Model for Every Woman.

In making the dresses of the present time the main consideration is the preservation of the slender, vouthful outline which fashion has decreed shall be retained. This cannot be done if the underwear is at all bulky, and it has been found that the use of the combination style of underwear is a great help in reducing the amount of material which must be covered by the outer garment.

Of course, the arrival of summer means also that sheer materials will be used to the exclusion of nearly all others, at least in all dresses except the plain tailor-made styles. This makes the demand for compact underwear insistent, and it is impossible to be well dressed without giving this point due consideration.

Many of the newer garments are cut in a single piece, and for these there is no material quite equal to embroidered flouncing. Manufacturers are making it in many different widths with the same pattern adapted to them, and in this manner we can purchase the narrow flouncing for the corset covers which we make, while wider pieces are obtainable for the petticoats and drawers.

#### Colored Underwear Pretty.

The liking for underwear made of colored materials adds a very pretty note to the outfit for summer wear. The dainty pink and blue and lilac flower designs which are found in organdie are often used, and the silk and cotton mixtures in delicate colorings take their turn as well.

All materials, whether white or colored, are very elaborately trimmed or embroidered. The idea of flatness is always borne in mind, however, and the edgings are put on flat, and any quantity of insertions are used. Ribbon, beading, inserted medallions, and, of course, the loveliest of hand work are all pressed into the service of the wearer of dainty underwear.

Take for example the combination shown in the accompanying illustration. It is certainly charming just as shown, made of wide flouncing, the corset cover seamed down the center of the back, to insure flatness here, and allowed a very little fullness in front. The deep yoke gives absolute plainness around the hips, and the fact that the flouncing is attached with pleats instead of gathers means that there will be no lines or wrinkles anywhere.

Pattern 4914 is cut in sizes 32 to 44 inches bust measure. The above pattern can be obtained by sending 10 cents to the office of The Washington Herald

#### Cost of This Suit in Three Materials EMBROIDERED FLOUNCING 51/4 yards of embroidered flouncing, 17 inches ..... \$2.10

So great is the demand for novel wars to be visited by the sight-seers. The of entertaining, particularly by those good patient women who plan, all sorts of functions to raise church funds, that I am confident a unique affair that was

No Consideration for Distance.
Having no consideration for distance to
be traversed, the tourists sped away in
the big sight-seeing cars to the home of
Mrs. A. H. Thompson, which, for the occasion, was Greece.

Here again suitable refreshments were served, and the home visited was trans-WHITE HAIR NEEDS

CAREFUL HANDLING

CAREFUL HANDLING

CAREFUL HANDLING

Lemon Juice in Shampoo Adds to Its Whiteness.

White hair, like white gowns, needs careful handling, or it soon is ugly and lill-kept looking.

Bushes and combs should be washed

Bushes and combs should be washed every day or so. A dirty brush makes white hair dull.

Ordinary shampoo mixtures are apt to make white hair streaky. The best for it is made from the whites of two egs-mixed lightly with a teaspoonful of warm water. travelers discussed at leisure the pleas ure of visiting Europe in an automobile for the sum of \$5 cents. When news of this entertainment reach-ed Holland, the conductors of the party

received a cablegram of thanks for the compliment paid the Queen of that coun-

Many tonics used with good effect even on golden hair are not suitable for white-haired women. If carefully applied, crude oil can be used occasionally or all little white vaseline may be rubbed into the scalp.

In using any grease keep it off long hair, as it acts as a dust collector and dulls the luster of hair.

White hair to be lovely must have a silvery tint. When the hair is at peppeans and salt stage it can sometimes be made white quickly by intelligent treatment by a professional.

Shampooing the hair with lemon is excellent for white hair. Put half the cut lemon in a thin mustin cloth and rubover scalp, which has first been thoroughly wet.

### SKIN DISEASES OF DOGS ARE OFTEN CAUSED BY OVERFEEDING

By EDWARD 8. SCHMID. Noncontagious skin diseases are usual-ly caused by overfeeding and want of

exercise, or, paradoxical as it may seem, by poor or unsuitable food and general neglect. The disease is a blod complaint, resulting from the assimilative organs not fulfilling their functions.

Surfeit.
This may affect any part of the body

This may affect any part of the body: the skin is first inflamed in patches, showing in white dogs almost a scarlet redness through the coat; a sticky exuda-tion is given off from the skin and forms into scabs; these scabs fall off, taking the hair with them, leaving the skin in a red, inflamed state. To Treat Surfeit.

First give a dose of saline purgative medicine, such as Epsom salts, the dose being from one drachm to one ounce, according to the size of the dog; this made with vascine or with Sanitas vet-medicine should be dissolved in hot erinary olntment. sore places an eczema cure should be TRIMMING FEATURES freely applied twice or thrice a day, a es irritation, which at times is very great, and assists the healing of the part.

very great, and assists the healing of the part.

A dose of aperient biscults every third day will in these cases exercise a beneficial effect. Sometimes, as an alternative, a little oil of tar may be applied with a fiannel. This should be repeated every day for two or three days, or until the part is healed.

Dogs affected with this complaint must be allowed variety in their diet, which should consist of fibrine biscuits, oatmeal, or rice and vegetables mixed with some gravy or soup.

A little flowers of sulphur, from sufficient to cover a dime to enough to cover a half dollar, according to the size of

Dog should Be Exercised.

The dog should be given plenty or exercise. In some chronic cases of exercise when the treatment above indicated does not prove effective, a course of the case of tonic should be given. An alterna

cuit, which should be given broken up small and soaked in soup. In some cases which have been standing a long time good effect follows the dressing of the patient all over with sulphur ointment

### THE ROBIN RAIN SONG.

THE ROBIN RAIN SONG.

WHAT is that?" asked Marion. For the moment her mother did not answer and again came the sweet little again. "What is it?" asked Marion again, as she rose from her little rocking chair and went close to the piazar aril. "Why, it is the robin redbreast singing to the rain," answered her mother.

And then Marion, drawing her chair up close, listened in wonderment at the pings along over the sun-parched grow and the sweet fern bush, "and my our vanit me to get your rain." Interrupted the sweet fern, in spite of his suffering for lack the sweet fern, in spite of his suffering for lack the sweet fern, in spite of his suffering for lack the sweet fern bush, "and my our vanit me to get your rain." Interrupted the sweet fern bush, "and my our vanit me to get your rain." Interrupted the sweet fern bush, "and you want me to get your rain." Interrupted the sweet fern bush, "and you want me to get your rain." Interrupted the sweet fern bush, "and you want me to get want for many the synthesis and rever talked to anyone one down to hear it."

Oh, dear me," said the robin, "I am feet was very long the things had never talked to anyone one down to hear it."

Oh, I will try, I will try, "chirped hearthy me to get want to find a big, fat worm, but the clouds when the clouds when the clouds when the sweet fern bush," and flying to the top of a reverse to the sweet fern bush, "and the robin, and flying to the top of a reverse to the sweet fern bush," and the robin, and flying to the top of a reverse to many
